ILEX CRENATA KINGSVILLE—

Kingsville A new introduction. Very dwarf, Japanese Holly. This new plant is extremely compact and slow-growing.
Dwarf Its hardiness excels all of the Japanese Hollies. The original plant, 28 yrs.
Jap. Holly yrs. old measures 14 in. high by 22 in. wide, and is so dense from its short twiggy growth, it can almost be sat upon without injury. Ideal for rockeries, edging, Knott gardens, and in all positions where very dwarf, compact plants are required. The hardiness of this dwarf compact Jap. holly should prove of great value in northern gardens. Stock limited.

BUXUS —			
microphylla -compact (Dwarfest Box in the world)			
Kingsville Dwarf Boxwood			
The newest introduction. Dwarfest of all boxwoods and extremely hardy, this little gem of boxwood has stood all weather conditions in the Pocono Mts. where temperature drops below zero. The dwarfest box in the world. Ideal for edging, rockeries, knot gardens, and all other uses where plants are required to remain dwarf. Original plant after twenty-eight years, is now about 11-12 in. high by 20-21 in. wide. A rare gem.	100	1000

Kingsville—Kingsville Dwarf Holly

A new introduction of very dwarf Japanese Holly. This variety is extremely compact and slow-growing. Its hardiness excels all others of the Jap. Hollies. Our old original plant which is twenty-eight years old, measures 14 in. high by 22 in. wide and is so dense from its short twiggy growth, it can almost be sat upon without injury.

Ideal for rockeries, edging and in all positions where very dwarf, compact plants are required. The hardiness of this dwarf compact Jap. Holly should prove of great value in northern gardens. Stock limited.
